Police Encounters with Filming Citizens

Whether they are the obnoxious anti-police type, the dangerous anti-police type, the paranoid type, a regular person with a dash cam or iPhone, or a combination, a citizen with a video camera should not change how we as police officers act and react to any situation.

When a filming citizen encounter goes bad for the officer, many times it is due to an officer not clearly understanding what his/her rights, duties and responsibilities are. Because of this, they hesitate in responding, and finally over act to a scenario that can appear as if the officer instigated or elevated the encounter.

Police Encounters with Filming Citizens was developed by Jorey Herrscher, a former Police Officer, Police Attorney, and Police Academy Instructor with the goal of building confidence in officers while maintaining the ultimate goal of officer safety and secondly, legal liability.

Departments who have attended **Police Encounters with Filming Citizens** have had reduced negative incidents involving filming citizens that can embarrass at the least, and lead to officer injury or legal liability at the worst.
